

Status as January 2023

REACH-Directive (EC) No. 1907/2006

Declaration about the application / absence of hazardous substances

Dear Sirs,

in terms of REACH, our company W. Oberecker GmbH; as a manufacturer of products (electro-solenoids and similar components), is classified as a downstream user and as a downstream user W. Oberecker GmbH in general does not apply to the registration liability according to REACH.

For all products supplied by us there is no registration duty in terms of REACH. If we use chemical substances within our products, for which there will be a registration duty, we will take care for REACH-registration by our up-stream suppliers.

On our own behalf and to guarantee a high product safety we are very much interested in the consequent implementation of REACH and the resulting requirements. Particularly with regard to the chemical materials and formulations which are used in our products or during the production process we stay in ongoing contact with our up-stream suppliers for REACH confirmations.

The processes employed by us are mainly common processes, used in many branches and in big quantities. Our suppliers are allocated to watch out for substitute products or substitute production processes if the existing products or processes are not compliant to REACH.

After careful consideration of the new list of candidates (ECHA-list – status 12/2022) none of the new substances are used in our products. According to the former list no hazardous substances are processed in our solenoids (in line with the REACH-directive).

If you need more information about REACH or the implementation of REACH, please contact our [REACH-appointee](#):

Mr. Andreas Oberecker (Tel. +49 7721 88769-12; Email: a.oberecker@oberecker.de)

**W. Oberecker GmbH
Elektromagnete**

Villingen-Schwenningen,
signed Andreas Oberecker (CEO)
